

## AutoSlide Fifth Wheel Hitch

Patent Pending

### Features

- Trailer and hitch move up to 14" automatically to adjust for extra clearance during turning maneuvers
- Double Pivot Head with 3 - 1" vertical height adjustments
- 2 Mounting systems UMS under box or UL Ultra above box installation
- 18,000 lb Capacity
- Powder Coat Finish
- Trucks with existing Hijacker Ultra or UMS hitches can be upgraded without changing the mounting rails
- Pin box adapters not required
- 5 Year Limited Warranty

### Operation and Use

There are many variables that can influence the ability to make a full 90° turn, such as trailer width; sharp or rounded trailer corners, truck cab profile. The placement of the trailer king pin box also has a part in determining the turning ability of the truck and trailer. It is always recommended, even with an automatic sliding hitch, that the trailer be equipped with an extended pin box that projects out forward from the trailer.

The AutoSlide, automatic sliding fifth wheel hitch is designed for short box trucks to give additional clearance between the truck's cab and the trailer during turning maneuvers. This hitch *may* allow 90° turns, but NOT IN EVERY CASE.

This hitch is designed for use with short box trucks that have a 6 1/2 foot box. If the hitch is installed in any trucks with a 5 1/2 foot or 6' box there is no expressed or implied guarantee that a full 90° turn can or will be achieved with the AutoSlide hitch.

Caution should always be exercised when using this or any hitch to ensure that the driver is aware of clearance between the truck and trailer when executing turning maneuvers.

## Trailer / Truck Cab Clearances

The following measurements\* show the amount of clearance created between the cab of the truck and the trailer when the AutoSlide hitch has reached it's maximum 14" travel during extreme turns.

### **UMS (Under bed) Installation**

Chevy 6 1/2 foot box	-	54"
Chevy 6-foot box	-	48"
Dodge 6 1/2-foot box	-	52"
Ford 6 1/2-foot box	-	50"

### **UL (above bed) Installation**

Chevy 6 1/2 foot box	-	52"
Chevy 6-foot box	-	46"
Dodge 6 1/2-foot box	-	49"
Ford 6 1/2-foot box	-	50"
Nissan 6 1/2-foot box	-	48"
Toyota 6 1/2-foot box	-	44"

\*All measurements are approximate. Actual measurements may vary.
